Year 3 & 4 Visiting Shropshire Hills Discovery Centre.

Year 3 and 4 visited Shropshire Hills Discovery Centre in Craven Arms

To kick start the history aspect of our topic Marvellous Metals, Magnets and Materials we visited an ancient Iron Age hill fort and a replica Iron Age Roundhouse. We learned about the progress the discovery of Iron encouraged and how the hill fort was used as a means of defence. We then took part in a number of activities that the Iron Age people would have done daily such as grinding wheat, combing wool and building mud walls.

We replicated the size of an actual roundhouse! We learned that it would house many people and be a hive of lots of different activities and not just for sleeping!
