SCOOTER SKILLS TRAINING

Dear Parent or Carer,

On the **11th April** your child's class will be taking part in a Scooter Skills Training session. The programme is delivered by Telford & Wrekin Council's, Road Safety & Active Travel Team.

This fun filled session teaches children basic scooter handling and control skills through a variety of games and exercises. Scooting is regarded as a core activity and can help and improve co-ordination and balance. The training will take place on the school playground and **your child requires a scooter** to take part in the session. **(We are unable to provide scooters for this session.)**

Children need to wear a helmet during the session, please bring this with you if you have one, if not the team will have some helmets available to use. **If your child will need to borrow a helmet, please indicate this on the form below.**

Telford & Wrekin Council's Training Team consists of qualified, DBS (Disclosure and Barring Service) checked instructors with experience in teaching both scooter and cycle training.
