Forces and Magnets Workshop

Dear Parents/Carers,

We're excited to share that on **Friday 19th September**, we'll be welcoming a **specialist external provider** into school to deliver a **hands-on, interactive workshop** linked to our current science unit on **Magnets and Forces**.

Rather than travelling to a centre, we've chosen to bring the experience to school to help keep costs down — while still offering a **fun, memorable and valuable learning opportunity** for the children.

The **Forces & Magnets Workshop** is designed especially for KS2 and combines **science, drama and movement** to bring key concepts to life.

Children will explore:

- Push and pull forces
- Gravity and resistance
- Floating and sinking
- The fascinating world of magnets

They'll be predicting, testing and recording how objects move, using their bodies to show how forces work, and discovering how magnets are used in everyday life — all through exciting drama and role play activities.

This workshop will be a fantastic way to deepen their understanding of science in a creative and engaging way, and we're sure it will be a highlight of the term!

To confirm your child's place, please make a payment of **£5.70**, via **Arbour**, by **no later than Tuesday 16th September**.

Thank you for your continued support — we can't wait for the children to enjoy this brilliant experience!

Warm regards,

Miss Larlham & Mrs Aspinall
